Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION..

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-4, 7-14, and 17-30 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by daSilva (US 6,445,937 B1; cited and applied for the first time).

Regarding claims 1-4, 7-14, 17-21, and 27-30, the claimed invention reads on daSilva as follows. Refer to the entire disclosure of daSilva where the claimed first subsystem reads on the idle power control subsystem 150. The claimed second subsystem reads on the MOBILE PHONE BASEBAND MICROPROCESSOR 122. The entire patent to daSilva is directed to altering the activity of the first subsystem based at least in part based on power consumption information from the second subsystem.

Regarding claims 22-26, daSilva teaches a wireless telephone; the idle power control subsystem 150 (claimed first subsystem) is also read as the claimed application subsystem and it clear includes a general-purpose processor; and the MOBILE PHONE BASEBAND MICROPROCESSOR 122 (the claimed second subsystem) is also read as the claimed communication subsystem including a baseband processor.

Allowable Subject Matter

3. Claims 5, 6, 15, and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

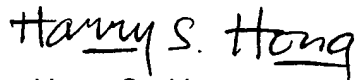

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kivari et al., Nakaya et al., Gray et al., and Ichimura all teach aspects of coordinating power conservation in mobile telephones.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Harry S. Hong whose telephone number is (703) 306-3040. The examiner can normally be reached on Monday-Friday, alternate Fridays off.
